Six questions should be attempted, namely:

all four questions in Section A (Questions 1, 2, 3 and 4);

one question from Section B (Question 5 or Question 6);

one question from Section C (Question 7 or Question 8).

Write the numbers of the six questions you have attempted in the marks grid on the back cover of your answer booklet.

The value attached to each question is shown in the margin.

Credit will be given for appropriate maps and diagrams, and for reference to named examples.

Questions should be answered in sentences.

Note The reference maps and diagrams in this paper have been printed in black only: no other colours have been used.
Question 1: Lithosphere

Study OS Map Extract number 1659/Exp–OL15: Swanage (separate item), and Reference Map Q1.

(a) Describe the map evidence that shows:
   (i) Areas A and B are areas of coastal erosion, and
   (ii) Area C is an area of coastal deposition.

(b) With the aid of annotated diagrams, explain the various stages and processes involved in the formation of either a stack or a sand bar.

Reference Map Q1
Question 2: Biosphere

Study Reference Diagram Q2.

**Describe and give reasons for** the changes in plant types likely to be observed across the transect as you move inland from the coast.

You should refer to named plant species likely to be found growing at different sites and to influencing factors such as shelter, pH and distance from the sea.

**Reference Diagram Q2 (Transect across sand dune coastline)**
Question 3: Population Geography

Study Reference Diagram Q3 which shows the five stages of the Model of Demographic Transition.

(a) **Describe** and **explain** the changes in the **total population** in stages 1, 2 and 3 of the model.

(b) The total population levels off in stage 4 and starts to fall in stage 5.

**Describe** the problems which a government may face when a country is in stage 5.

Reference Diagram Q3 (Model of demographic transition)
Question 4: Urban Geography

(a) For a named city which you have studied in an EMDC (Economically More Developed Country), explain the ways in which the site and situation have contributed to its growth.

(b) Study Reference Photograph Q4.

“Traffic congestion is now a major problem facing many cities in EMDCs”.

Describe and explain schemes which have been introduced to reduce problems of traffic management in any named city you have studied in an EMDC.

Reference Photograph Q4 (Traffic congestion)
SECTION B: Answer ONE question from this section, ie either Question 5 or Question 6.

**Question 5: Atmosphere**

Study Reference Diagram Q5.

**Explain** the physical and human factors that might have led to the changes in global air temperatures shown in the diagram.

Reference Diagram Q5 (Global air temperatures 1855–2005)
Question 6: Hydrosphere

(a) With the aid of a diagram, describe the global hydrological cycle.  

(b) Study Reference Diagram Q6.

Explain the differences in discharge between the urban and rural hydrographs shown in the diagram following a heavy rain storm.
SECTION C: Answer ONE question from this section, ie either Question 7 or Question 8.

Question 7: Rural Geography

Study Reference Diagram Q7 which shows three different farming systems.

Choose one of these farming systems and:

(i) explain the ways in which the diagram reflects the main features of your chosen system;

(ii) referring to a named area where your chosen system is carried out, describe the changes in farming practices that have taken place in recent years.

Reference Diagram Q7 (Farming systems)

Intensive peasant farming          Commercial arable farming          Shifting cultivation

Question 8: Industrial Geography

(a) Study Reference Diagram Q8A.

**Describe** and **explain** the impact of industry on the environment of an old industrial area such as that shown in Reference Diagram Q8A.

Reference Diagram Q8A (Old industrial landscape—South Wales)

(b) Study Reference Diagram Q8B.

For South Wales, or any other industrial concentration in the EU, **describe** and **explain** the main location factors that influence the location of new industrial developments.

Reference Diagram Q8B (New industrial landscape—South Wales)
[BLANK PAGE]
ACKNOWLEDGEMENTS

Paper 1 Question 5—Graph of Global air temperatures 1855-2005 taken from Climate Research Unit. Reproduced by kind permission of Climate Research Unit.

Two questions should be attempted, namely:

one question from Section 1 (Questions 1, 2, 3) and
one question from Section 2 (Questions 4, 5, 6).

Write the numbers of the two questions you have attempted in the marks grid on the back cover of your answer booklet.

The value attached to each question is shown in the margin.

Credit will be given for appropriate maps and diagrams, and for reference to named examples.

Questions should be answered in sentences.

Note    The reference maps and diagrams in this paper have been printed in black only: no other colours have been used.
Question 1 (Rural Land Resources)

(a) The Peak District and Yorkshire Dales National Parks are two areas of Upland Limestone.
Study Reference Diagram Q1A.
Describe and explain the physical features associated with upland limestone landscapes. Both surface and underground features should be included in your answer. 20

(b) For the Peak District National Park, or a named upland area you have studied:
(i) describe the opportunities which this landscape provides for a variety of land uses; and 8
(ii) explain the environmental problems and conflicts which may arise from the competing demands of these different land uses. 14

(c) Study Reference Diagram Q1B.
Select one of the conservation strategies and explain the ways in which it helps to protect the landscape. 8

Reference Diagram Q1A (Carboniferous Limestone Landscape)

Reference Diagram Q1B (Conservation Strategies)

AREAS OF OUTSTANDING NATURAL BEAUTY
National Parks
Sites of Special Scientific Interest (SSSIs)
Environmentally Sensitive Areas (ESAs)

Conservation Strategy
Question 2 (Rural Land Degradation)

(a) Study Reference Map Q2A and Reference Maps Q2B. Describe the climatic conditions found in Burkina Faso, and explain why such conditions may lead to the degradation of rural land.  

(b) Explain how inappropriate farming activities such as overcultivation, monoculture, overgrazing, poor irrigation techniques and inappropriate cultivation of marginal land have led to land degradation in some named areas of North America.

(c) Study Reference Statements Q2A and Q2B. Select one of the statements and explain how degradation has impacted on the social and economic ways of life in that area.

(d) Referring to named areas in North America that you have studied, describe and explain ways in which changes in farming methods have reduced land degradation.

Reference Statement Q2A (The Sahel)

28.5 MILLION PEOPLE ARE AFFECTED BY DESERTIFICATION IN THE SAHEL REGION OF AFRICA.

Reference Statement Q2B (The Amazon Basin)

179 000 SQUARE KILOMETRES OF RAINFOREST HAVE DISAPPEARED IN THE AMAZON BASIN SINCE 1997, EQUIVALENT TO 78% OF THE TOTAL AREA OF BRITAIN.
Question 2 – continued

Reference Maps Q2B (Burkina Faso: mean annual rainfall patterns)
Question 3 (River Basin Management)

(a) Study Reference Map Q3 and Reference Diagram Q3. Explain why there is a need for water management in Egypt. 10

(b) For the Aswan High Dam or any dam you have studied in Africa or North America or Asia, explain the physical factors which should be considered when selecting the site for the dam and associated reservoir. 10

(c) Describe and explain the social, economic and environmental benefits and adverse consequences of a named major water control project in Africa or North America or Asia. 24

(d) “Potential ‘water wars’ are likely in areas where rivers and lakes are shared by more than one country or state, according to a UN Development Programme (UNDP) report.” Explain why political problems can occur in the development of water control projects. 6

SECTION 2

You must answer ONE question from this Section.

Question 4 (Urban Change and its Management)

(a) Study Reference Table Q4A.
   (i) Describe the changes shown in the table.
   (ii) Suggest reasons for the differences between more developed and less developed regions.  

(b) With the aid of Reference Photograph Q4 and referring to a named city which you have studied in an ELDC (Economically Less Developed Country):
   (i) describe the social, economic and environmental problems created by shanty towns; and
   (ii) describe ways in which such problems are being tackled.  

(c) Study Reference Table Q4B which highlights problems which have occurred in cities in EMDCs (Economically More Developed Countries) over the last fifty years. Choose one of these problems and, with reference to a named city in an EMDC:
   (i) suggest reasons for the problem;
   (ii) describe strategies used to solve the problem; and
   (iii) comment on the success of these strategies.
Reference Table Q4A (Percentage of total population living in urban areas)

- Housing change in the Inner City
- The decline of traditional industries
- The rise of out of town shopping
Question 5 (European Regional Inequalities)

(a) Study Reference Map Q5.

The European Union (EU) is often said to fit the “Core and Periphery” model. Ten of the twelve countries which joined the EU since 2004 have formed a new “Eastern Periphery”.

Suggest both physical and human reasons for the lack of prosperity in the new “Eastern Periphery”.

(b) Study Reference Table Q5 which shows a range of indicators for six European Union countries.

Describe and explain the ways in which the information shows the differences between the three groups of countries shown in the table.

(c) “There are marked differences in economic development within the United Kingdom (UK).”

Describe and explain both the physical and human factors that have led to regional inequalities within the UK.

(d) For either the UK or another named country in the EU which has marked regional differences in economic development, discuss ways in which the National Government and the EU have tried to tackle problems in less prosperous regions.

Question 6 (Development and Health)

(a) Study Reference Map Q6.

(i) **Describe** clearly **two** economic and **two** social indicators of development which could be used to produce a map such as this. **8**

(ii) **Suggest reasons** for the wide variations in development which exist **between** Economically Less Developed Countries (ELDCs).

You should refer to named ELDCs you have studied. **12**

(iii) There are often considerable differences in levels of development and living standards **within** a single country.

Referring to a named ELDC which you have studied, **suggest reasons** why such regional variations exist. **10**

(b) For **either** malaria or bilharzia or cholera:

(i) **describe** the environmental **and** human factors which put people at risk of contracting the disease; and **8**

(ii) **describe** and **evaluate** the methods used to control the spread of the disease. **12**
