Six questions should be attempted, namely:

all **four** questions in **Section A** (Questions 1, 2, 3 and 4);

**one** question from **Section B** (Question 5 or Question 6);

**one** question from **Section C** (Question 7 or Question 8).

Write the numbers of the **six** questions you have attempted in the marks grid on the back cover of your answer booklet.

The value attached to each question is shown in the margin.

Credit will be given for appropriate maps and diagrams, and for reference to named examples.

Questions should be answered in sentences.

**Note**  The reference maps and diagrams in this paper have been printed in black only: no other colours have been used.
Question 1: Atmosphere

Study Maps Q1A.

(a) **Describe** the origin, nature and characteristics of the Maritime Tropical and Continental Tropical air masses.

Maps Q1A: Location of selected air masses and the ITCZ in January and July

Key:

- mT = Maritime Tropical
- cT = Continental Tropical
- ITCZ = Inter Tropical Convergence Zone
Question 1: Atmosphere (continued)

Study Maps Q1A and Q1B and Diagram Q1.

(b) **Describe** and **explain** the variation in rainfall within West Africa.

Map Q1B: West Africa

---

Diagram Q1: Average Monthly Rainfall/Days with Precipitation

**Gao:** total precipitation—200 mm

**Bobo-Dioulasso:** total precipitation—1000 mm

**Abidjan:** total precipitation—1700 mm
Question 2: Biosphere

(a) **Explain** fully what is meant by the term climax vegetation. Study Diagram Q2.

(b) **Describe** and **give reasons** for the changes in plant types likely to be observed across the transect as you move inland from the coast. You should refer to named plant species in your answer.

Diagram Q2: Transect of Sand Dune System

![Diagram of Sand Dune System](image_url)
Question 3: Rural Geography

Study Map Q3.

Referring to a named area in either a shifting cultivation or an intensive peasant agricultural system:

(i) **describe** and **explain** the main features of your chosen farming landscape; 8

(ii) **describe** the recent changes that have taken place; **and**

**discuss** the impact of these changes on the people and their environment. 10

Map Q3: Generalised distribution of selected agricultural systems
Question 4: Industry

Study OS Map Extract number 1882/159: Swansea (separate item), and Maps Q4A and Q4B.

(a) Using map evidence, **describe** and **explain** the physical and human factors that have encouraged industry to locate in areas A and B.

(b) Study Map Q4B.

**Explain** ways in which the European Union and national government can create industrial regeneration in South Wales, or any other named industrial concentration in the EU which you have studied.

Map Q4A: Location of industrial areas in Swansea

Map Q4B: South Wales—Location of new industrial developments

* Location of industrial developments since 1950
SECTION B: Answer ONE question from this section, ie either Question 5 or Question 6.

Question 5: Lithosphere

Study OS Map Extract number 1882/159: Swansea (separate item).

(a) Using map evidence, **identify** the features of coastal erosion from GR 513851 (Oxwich Point) to GR 636871 (Mumbles Head).

(b) With the aid of annotated diagrams, **explain** the formation of **one** of the erosional features described in part (a).

Question 6: Hydrosphere

(a) Study Diagram Q6A.

“A drainage basin is an open system with four elements—inputs, storage, transfers and outputs.”

Describe the movement of water within a drainage basin with reference to the four elements above.

Diagram Q6A: A Drainage Basin
Question 6: Hydrosphere (continued)

(b) **Describe** and **explain** the changing river levels on the River Thaw at Cowbridge on 26 July 2007.

Diagram Q6B: Flood Hydrograph for the River Thaw at Cowbridge, 26 July 2007

SECTION C: Answer ONE question from this section, ie either Question 7 or Question 8.

Question 7: Urban Geography

(a) For a named city which you have studied in the Developed World, explain the ways in which its site and situation contributed to its growth. 6

(b) With reference to any Developed World City you have studied, describe and explain the land use changes in recent years in either the Central Business District (CBD) or the inner city. 8
Question 8: Population Geography

“Apart from 1941, during the Second World War, the UK has carried out a census every 10 years since 1801.”

(a) Describe how the UK gathers population data between these censuses and explain why it is important for countries to obtain accurate population data.

(b) Giving named examples, explain why carrying out a census may be more difficult and the results less reliable in Developing Countries than in Developed Countries such as the UK.
Answer any **two** questions.

Write the numbers of the **two** questions you have attempted in the marks grid on the back cover of your answer booklet.

The value attached to each question is shown in the margin.

Credit will be given for appropriate maps and diagrams, and for reference to named examples.

Questions should be answered in sentences.

**Note**  The reference maps and diagrams in this paper have been printed in black only: no other colours have been used.
Question 1 (Rural Land Resources)

(a) Study Map Q1A.

Describe and explain, with the aid of annotated diagrams, the formation of the main features of glacial erosion in the Lake District or any other glaciated upland area which you have studied.

(b) Study Diagram Q1.

With reference to the area around Coniston Valley, or any other upland area you have studied, explain the social and economic opportunities created by the landscape.

(c) Study Map Q1B.

The Lake District and Snowdonia are both areas of outstanding glaciated scenery. Explain why these two National Parks attract widely differing numbers of visitors.

(d) For the Lake District or any other upland or coastal area you have studied:

(i) explain the environmental conflicts that may occur due to an influx of visitors. (You should refer to specific named examples within your chosen area);

(ii) for one of the conflicts explained in part (i), describe the solutions to this conflict and comment on their effectiveness.

Map Q1A: The Lake District
Question 1 – continued

Diagram Q1: Sketch Cross-section of the Coniston Valley in the Lake District

Map Q1B: Major Roads and Settlements around the Lake District and Snowdonia
Question 2 (Rural Land Degradation)

(a) **Describe** the processes of water and wind erosion which lead to soil degradation.  

(b) Study Map Q2 and Diagrams Q2A, Q2B and Q2C. 
   **Describe** and **explain** why the climate of Niger has led to severe land degradation.  

(c) For either Africa north of the equator, or the Amazon Basin, **explain** how human activities including deforestation, overgrazing, overcultivation and any other inappropriate farming techniques have led to land degradation.  

(d) For named areas of North America, **describe** and **explain** soil conservation strategies that have reduced land degradation.
Question 2 – continued

Question 3 (River Basin Management)

(a) Study Map Q3, Graphs Q3A and Q3B, and Table Q3. Explain why there is a need for water management in the Malaysian owned area of the island of Borneo.

(b) For the Bakun Dam or any water control project you have studied in Africa or North America or Asia, explain the physical factors that should be considered when selecting sites for the dam(s) and associated reservoir(s).

(c) (i) Describe and explain the social, economic and environmental benefits of a named major water control project in Africa or North America or Asia.

(ii) Comment on any problems caused by your chosen water control project.

Map Q3: Proposed Bakun Dam, Malaysia

![Map of Borneo and surrounding areas showing the Bakun Dam and major cities.

[Turn over]
Question 4 (Urban Change and its Management)

(a) Study Map Q4A (on Page nine).

Describe and account for the distribution of major cities in either the UK or any other Developed World country that you have studied. 10

(b) Study Map Q4B (on Page ten) and Table Q4 (on Page eleven).

“A Games Like No Other—Glasgow 2014 Commonwealth Games.
Glasgow will host the 20th Commonwealth Games where 71 countries will compete in 17 sports at various venues across the city. New facilities will involve massive investment and regeneration, particularly in the east end of the city.”

Discuss the advantages and disadvantages of this development for the residents of the East End of Glasgow. 10

(c) For Glasgow, or a named city you have studied in the Developed World, describe and explain why it suffers from traffic congestion. 10

(d) Many cities in the Developing World are experiencing rapid population growth. With reference to a named city that you have studied in the Developing World:

(i) describe and explain the problems caused by this rapid growth; 12

(ii) describe the methods the residents and local authorities might use to tackle these problems. 8

(50)

Question 5 (European Regional Inequalities)

(a) Study Table Q5A.

“The European Union in 2009 had 27 member states and a waiting list of countries who had applied to join; including Turkey, Croatia, the Former Yugoslav Republic of Macedonia and Iceland.”

Suggest reasons why countries may wish to become members of the European Union.  

(b) Study Map Q5 and Table Q5B.

Italy is often described as having a “North-South Divide”. With reference to specific provinces and data provided in the table, comment on the accuracy of this statement.

(c) For Italy or any other country of the European Union which has marked differences in economic development between regions, describe the physical and human factors that have contributed to such regional differences.

(d) For the country chosen in part (c):

(i) discuss ways in which less prosperous regions can receive help from their national government to overcome such problems; and

(ii) comment on the effectiveness of these strategies.

Table Q5A: GNP per Capita data for selected EU countries

**Question 6 (Development and Health)**

(a) “Levels of wealth, health and economic development are not evenly spread within individual countries.”

Study Map Q6 and Table Q6.

(i) In what ways does the information given in the table suggest that the eight provinces of Kenya are at different levels of development?  

(ii) For Kenya or any other Developing Country that you have studied, suggest reasons why such regional variations exist within a Developing Country.  

(b) For malaria, or bilharzia, or cholera, describe the measures that can be taken to combat the disease and explain the varying effectiveness of these measures.  

(c) “The ultimate goal of Primary Health Care is better health for all.”

(World Health Organisation)

Describe some specific Primary Health Care strategies that you have studied and explain why these strategies are suited to Developing Countries.
